

COST ESTIMATES

HOW MUCH WILL THIS COST?

During the design process to Reimagine Ribaut Road, we developed a number of **potential sections** of the corridor to be constructed over time, or all at once. Doing so, we also developed **planning-level cost estimates** using standard unit cost values from similar roadway construction projects.

Sections + Cost* to Construct <i>*Planning-level estimates</i>	
Section	Cost
Section 1 Boundary Street to Reynolds Street	\$14,325,000
Section 1.A Boundary Street Roundabout	\$2,950,000
Section 1.B Depot Street / Bay Street Roundabout	\$2,000,000
Section 2 Reynolds Street to Lady's Island Drive	\$11,950,000
Section 2.A Reynolds Street Roundabout	\$2,000,000
Section 3 Lady's Island Drive to Russell Bell Bridge	\$11,575,000

TOTAL: \$44,800,000

WHAT ABOUT BURYING THE UTILITIES?

Throughout this project, we repeatedly heard from residents a desire to bury unsightly utilities located along Ribaut Road. To get an understanding of the potential impact of doing so, we developed **planning-level cost estimates** to bury the existing utilities during the construction of Ribaut Road.

Cost* to Bury Utilities <i>*Planning-level estimates</i>	
Section	Cost
Section 1 (incl. 1.A + 1.B) Boundary Street to Reynolds Street	\$4,725,000
Section 2 (incl. 2.A) Reynolds Street to Lady's Island Drive	\$6,475,000
Section 3 Lady's Island Drive to Russell Bell Bridge	\$5,750,000

TOTAL: \$16,950,000
